Executive Summary

DevOps Engineer with hands-on experience in AWS cloud infrastructure, Kubernetes, Docker, Terraform, and CI/CD automation. Experienced in migrating containerized applications from Amazon ECS to Amazon EKS, provisioning infrastructure as code, and troubleshooting production issues. Skilled in Linux, Bash and Python scripting, and monitoring with Prometheus, Grafana, and Loki, with a focus on reliable cloud operations and efficient software delivery.

Technical Skills

- **Cloud Infrastructure:** AWS, EC2, IAM, Amazon ECS, Amazon EKS
- **Containers & Orchestration:** Docker, Kubernetes, Helm
- **Infrastructure as Code:** Terraform
- **CI/CD & Automation:** Jenkins, GitHub Actions
- **Monitoring & Logging:** Prometheus, Grafana, Loki
- **Programming & Scripting:** Python, Bash, JavaScript
- **Version Control & OS:** Git, GitHub, Linux
- **Backend & Web:** Node.js, Express.js, REST APIs, MySQL, HTML, CSS

Soft Skills

Team Collaboration • Communication • Problem-Solving • Adaptability • Continuous Learning

Professional Experience

Sentinel Fox, PVT Ltd December 2025 – September 2026
Role: DevOps Engineer

- Executed an end-to-end migration of containerized applications from Amazon ECS to Amazon EKS, covering Terraform configuration, AWS infrastructure provisioning, Kubernetes setup, and application deployment.
- Provisioned and managed AWS cloud infrastructure using Terraform and Infrastructure as Code practices.
- Developed and maintained Jenkins and GitHub Actions pipelines to automate application build and deployment workflows.
- Configured and managed containerized applications using Docker and Kubernetes.
- Monitored application and infrastructure health with Prometheus and Grafana, and investigated logs using Loki.
- Troubleshot production infrastructure, networking, application deployment, and CI/CD pipeline issues.
- Collaborated with development and infrastructure teams through Git-based workflows to support releases and deployment improvements.

Projects

Knowledge Hub – Student Content Platform | Node.js, Express.js, MySQL, JavaScript, HTML, CSS

- Developed a web platform for students to publish, manage, and explore educational content.
- Built backend functionality and REST APIs for authentication, article management, and content operations using Node.js, Express.js, and MySQL.

Education

Master of Computer Applications (MCA) 2024 – 2026
Mepco Schlenk Engineering College

Bachelor of Computer Science 2021 – 2024
Sri Kaliswari College

Awards & Accomplishments

- Certified Kubernetes Administrator (CKA)
- Programming in Java – NPTEL
- Cloud Computing and Distributed Systems – NPTEL
